

Localised Flooding in Durban SACO CFR and ZacPak Operations

Dear Valued Clients,

Due to the heavy rainfall experienced across large areas of Durban, which has subsequently caused road closures and extreme flooding, we regret to advise that Mobeni has been impacted by power outages. The suspension of public transport has affected the availability of ground operational staff in the depot adversely.

Where possible, the SACO CFR Ocean and Airfreight employees are working remotely. With no operational staff available at the depot, normal operations for the day will be impacted.

We apologise for any inconvenience caused and will keep you updated on the situation.

Should you have any queries, please contact your SACO CFR representative.

Thank you for your continued support.

Kind regards
The SACO CFR & ZacPak Team
